## **NOTICE**

### **2003 INTERNATIONAL FIRE CODE**

March 3, 2006

The **2003 International Fire Code** has been adopted with amendments by the Tempe City Council with an effective date of March 19, 2006. Additional information may be found on our web site at [www.tempe.gov/tdsi](http://www.tempe.gov/tdsi). Tempe amendments are available at our front counter and through our web site.

Projects submitted after Sunday, March 19, 2006 and before April 3, 2006 may be reviewed under the newly adopted International Codes or the codes in effect prior to January 2, 2006. Projects will be reviewed in their entirety under one code(s) or the other. A project though may be reviewed under the 1994 Uniform Building Code and under the 2003 IFC or other similar combinations.

It is the responsibility of the applicant to make known at the time of application, the code or codes under which the project was designed. Our review of the plans will be based on the code information provided on the plans or separate declaration. If no other information is available, the plans will be reviewed under the newly adopted codes. If a request is made to re-review a set of plans under a code different from the first review, a supplemental plan check fee will be charge based on our hourly rate and turnaround times will be adjusted accordingly.

Projects submitted on or after April 3, 2006 will be reviewed **only** under the new codes. Your project and the code under which it was reviewed are linked until either the plan check expires or the related permits expire or are finalised. All project revisions or field changes will be reviewed under the same code(s) under which permits were originally issued.
